# Confined Spaces

WAC 296-809-100

## Scope

### WAC 296-809-100 (Continued)

#### Definition:

A **confined space** is a space that is **all** of the following:

- Large enough and arranged so an employee could fully enter the space and work.
- Has limited or restricted entry or exit. Examples of spaces with limited or restricted entry are tanks, vessels, silos, storage bins, hoppers, vaults, excavations, and pits.
- Not primarily designed for human occupancy.

#### Helpful Tool:

##### Rules in Other Chapters that Cover Confined Spaces

Rules in other chapters that cover confined spaces may also apply to your work. You can find a list of these rules in the Resources section of this chapter.

#### Note:

- Requirements in other chapters may apply to your work. You will find some safety and health requirements are addressed on a broad level in this chapter, while being addressed for a specific application in another rule. When this happens, both requirements apply and shouldn't conflict. When a conflict does occur, you need to follow the more specific requirement.
- If you are uncertain which requirements to follow, contact your local Labor and Industries (L&I) office.
- For a complete list of local L&I offices, see the resources section of the Safety and Health Core Rules, chapter 296-800 WAC.
